UC-01 Browse & filter

Guest or Customer opens Shop, filters by occasion, flower type, or price, and scans a short curated list instead of an infinite catalog.

UC-02 View arrangement

The shopper opens a product page, compares sizes, reads what's included / delivery / care, and sees similar bouquets.

UC-03 Cart

The shopper adds a size and quantity. Cart persists by session (and merges after sign-in). Quantity can be changed or removed.

UC-04 Checkout

Guest or Customer enters recipient, address, Metro Manila area, date, time window, optional gift note, optional promo SARIWA10, and payment method (COD, GCash, card).

UC-05 Place order

System snapshots line items, fees, and discount, issues an SW-##### number, and clears the cart. Same-day orders are rejected after 3:00pm Asia/Manila.

UC-06 Track order

Anyone with the order number can look up status, recipient, schedule, and totals — no account required.
